REMARKS

The figures of births and deaths shown in this statement for week ending the 4th February, 1956, relate to 194 towns with an estimated population of 29,416 thousands. The total number of towns is 313 and their population is 41,203 thousands. Thus 62% of the total number of towns representing 71% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 15,667 and 5,973 representing birth and death rates of 27.7 and 10.6 per thousand of population respectively.

(a) *States (Part A and C).*—The data here relate to 161 towns with an estimated population of 24,332 thousands. Information about Ajmer, Bihar and Madras could not be included. The total number of towns is 251 and their population is 33,402 thousands. Thus 64% of the total number of towns representing 73% of the total

population is covered. The number of births and deaths recorded in these towns were 13,513 and 5,234 representing birth rates and death rates of 28.9 and 11.2 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B).*—The data here relate to 33 towns with an estimated population of 5,084 thousands. The total number of towns is 62 and their population is 7,801 thousands. Thus 53% of the total number of towns representing 65% of the total population is covered. The number of births and deaths recorded in these towns were 2,154 and 739 representing birth and death rates of 22.0 and 7.6 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
